PUFFTOPIA

VISUAL SCREEN APPROVAL PACK

Little Puffs. Big Adventures!

Fixed PDF layout: each concept panel is on its own page, with a clear title and readable purpose notes. The artwork has been enlarged using high-quality resampling and mild sharpening only; no new picture or replacement artwork has been generated.

Important quality note: the supplied source panels are only about 190–335 pixels wide. This corrected PDF avoids unnecessary full-page stretching and improves presentation, but genuine fine detail cannot be recovered from a small source image. For truly crisp final screens, each screen must be exported or rendered separately at high resolution.
